

Project Design Phase
Proposed Solution Template

Date	28 June 2026
Student ID	23A51A05M5
Project Name	Employee ID Card Request
Maximum Marks	2 Marks

Proposed Solution :

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Manual, paper-based ID card requests cause delays, lack of status tracking, and administrative inefficiencies in employee identity management.
2.	Idea / Solution description	An automated, self-service digital catalog item on the ServiceNow platform that allows employees to submit requests, track progress, and receive automated notifications.
3.	Novelty / Uniqueness	Integrates automated workflow triggers (Flow Designer) with existing corporate directory (AD/SSO) for pre-filled data, eliminating manual data entry errors.
4.	Social Impact / Customer Satisfaction	Enhances employee experience through transparency and speed, while reducing the physical and administrative burden on the security/HR teams.
5.	Business Model (Revenue Model)	Operational efficiency model; reduces internal administrative costs, optimizes staff time, and improves security compliance through digital audit trails.
6.	Scalability of the Solution	Highly scalable; the ServiceNow-based architecture supports thousands of concurrent users and can be expanded to include additional services like access control integration.
